APARNA RAMESH

Syracuse, NY 13210 | +1 3154019356 | contact.aparnaramesh@gmail.com | www.linkedin.com/in/aparna-ramesh-9b391918b

SUMMARY

Project Management professional with 5 years in telecom and automotive software delivery, skilled in planning, risk management, stakeholder coordination, and Agile/Waterfall execution. Proficient in Jira, SQL, Java, and data analysis; pursuing M.S. in Engineering Management at Syracuse University with focus on Project Management, Technology Valuation and Business Analytics

EDUCATION

Syracuse University - College of Engineering & Computer Science, Syracuse, NY — August 2025 – May 2027
Master of Science Engineering Management - 3.6 GPA (Current)

SRM University - SRM Institute of Science and Technology, Chennai, India — July 2016 – May 2020
Bachelor of Technology in Computer Science and Engineering - 90%

SKILLS

- **Project Management:** Project Planning (WBS, Critical Path), Project Charter, RACI Matrix, RAID Management, SWOT Analysis, Scheduling & Estimation, Risk & Issue Management, Stakeholder Management, Change Control, Status Reporting, Sprint Planning, Requirement Traceability Matrix
- **Tools:** Jira, Rally, ALM Octane, Confluence, Figma, MS Project, MS Excel, MS Access, MS Visio, MS PowerPoint, Tableau, Power BI, MS SQL Server, SharePoint, Git
- **Frameworks:** Agile SDLC (Scrum/Kanban), Waterfall SDLC, Quality Assurance Lifecycle (STLC), Release Management
- **Testing Methodologies:** End to End Testing**,** Manual, Functional, Regression, Sanity, API, GUI, UAT, Automation, Exploratory Testing, Defect Management, Root Cause Analysis, Test Case Design, Test Execution
- **Testing & Automation Tools:** Postman, SOAP UI, Selenium
- **Programming & DB:** Java, SQL, R Commander, Database Validation
- **AI & Emerging Technologies:** Prompt Engineering, Generative AI (LLM), Machine Learning Fundamentals, NLP Basics, AI assisted Automation & Productivity Tools (Claude, Copilot)
- **Cloud Technologies:** Azure, AWS, GCP
- **Analytics & Business:** Advanced Excel (Pivot Tables, Power Query, Pivot Charts, VLOOKUP/XLOOKUP)**,** Data Visualization, Statistical Reasoning, Cost-Benefit (NPV/IRR), Process Optimization, Google Analytics, KPI Reporting
- **Soft Skills:** Leadership, Team Management, Cross-functional Collaboration, Problem Solver, Mentorship, Presentation Skills

EXPERIENCE

Senior Software Development Engineer Test, Comcast – Chennai, India — April 2023 – July 2025

- Led delivery of 20+ software releases with 40 engineers, coordinating cross-functional teams, handling timelines, and collaborating with stakeholders to ensure 100% on-time delivery and 95%+ defect detection through API (Postman) and SQL validation
- Improved release efficiency by 40% by introducing automation frameworks (Selenium) and driving process optimization; recognized with Comcast Circle of Success, Spotlight, and Champ Awards for delivery excellence

Software Development Engineer Test, Comcast – Chennai, India — August 2021 – March 2023

- Applied Agile and Waterfall SDLC practices managing feature delivery and defect resolution, accomplishing 100% adherence to project timelines and ensuring consistent release quality
- Oversaw manual, regression, API, and UAT testing, achieving 98%+ defect resolution while mentoring team members and driving Certificate Driven Development (CDD) initiatives; recognized with two Comcast High-Five Champ Awards

Software Engineer, ZF Friedrichshafen – Hyderabad, India — June 2020 – May 2021

- Spearheaded support for the AUTOSAR development team by enhancing diagnostics, controlling key lifecycle activities, and performing database validation, improving data accuracy by ~25% and reducing defect leakage by ~30%
- Performed ESCAN unit testing in Java, achieving 90%+ defect detection and ensuring timely milestone delivery

PROJECT

Comcast Orion Mid-Market - Telecom Service Delivery & Order Management — August 2021 – July 2025

- Managed end-to-end delivery of B2C telecom services (Metro Ethernet, Non-Metro Ethernet, OTT, Wi-Fi product) through Orion CRM, ensuring smooth order management from sales to billing
- Coordinated testing and validation across Amdocs products (OSO, ARM, SQO) and Comcast Tech 360 application, ensuring high-quality service fulfillment and on-time project delivery

AUTOSAR — June 2020 – February 2021

- Led support for AUTOSAR-compliant ECU architecture, spearheaded integration across 6+ modules and lifecycle activities, resulting in ~25% faster delivery timelines and enhanced cross-team efficiency
- Executed unit testing on 120+ code paths and validated AUTOSAR ESCAN procedures, identifying critical defects early and elevated test coverage by ~30%

AWARDS

- Comcast Circle of Success Award - 2024
- Spotlight and Champ Award - 2024
- High-five Champ Award - 2022, 2023
